Portfolio: <https://flyboy85749.github.io/Responsive-Portfolio/>

Summary

Front End Developer with a background in volunteering and a life-long desire to learn. Effectively combine creativity, problem solving, and leadership abilities to develop user-friendly applications, individually or as part of a team. Great patience, attention to detail, and sense of humor.

Technical Skills

Web Design/Development: PHP, MySQL, HTML5, CSS3, Photoshop, SEO, JavaScript, jquery, Git, Node, React

CMS: Wordpress, Drupal, Joomla

Operating Systems: Windows

Software: Zen Cart, Openads, Bamboo Invoice, Open Office, phplist

Relevant Experience

Christian Web Developer, Tucson, AZ

April 2019 - present

Owner/Web Developer

- Created a freelance web development site with HTML, CSS and JavaScript to be able to showcase my web development skills and abilities, and to provide visitors to my site with relevant information on how to create their own sites, and/or improve them.

Prescott Websites, Dewey, AZ

January 2007 – March 2011

Owner/Web Developer

- Owned and operated Prescott Websites, a web design and web development business. Created websites for clients using HTML, CSS, and PHP, utilizing best practices and the latest technologies; as well as provided hosting and SEO services for client sites.

Projects

Famished | <https://github.com/flyboy85749/Project-1> | <https://flyboy85749.github.io/Project-1/>

Famished was a team project app, which was created to fill the need of users that have special dietary restrictions (such as Vegan, Keto, Nut-Free, Lactose Intolerant, ...etc), to be able to locate restaurants in their area that serve food they can eat. The site uses Bootstrap and Fontawesome, an ajax API call to nutritionix.com, and Leaflet for the map display. We had a MVP well within the established deadline, and it was a well-organized collaboration between the five people on the team.

Giphy | | <https://github.com/flyboy85749/Giphy> | <https://flyboy85749.github.io/Giphy/>

Giphy was an individual assignment, and it was designed as a purely entertaining project. Just type in something that you like, and a button with that name will appear. Click on the button, and 10 images of that subject will appear below. Click on an individual image and it will animate. I used Bootstrap, Giphy API calls, and a very simple layout with this project.

Education

Full Stack Web Development Bootcamp Certificate: University of Arizona, Tucson, AZ

A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, JavaScript, JQuery, Bootstrap, Firebase, Node Js, MySQL, MongoDB, Express, Handlebars & React
